SKI RUN

Safety Information

AREAS BEYOND THE MARKED AND OPENED SKI RUNS ARE NOT SECURED FOR SKIING AND YOU ARE SOLELY RE-SPONSIBLE FOR YOUR OWN SAFETY.

Please stay well away from areas which are cordoned off. Observe the warning signs (for avalanche hazards and glacier crevasses) and the orange warning lights next to the panorama info boards.

RESCUE SERVICE

In the event that you witness a sports accident, please administer FIRST AID. Secure the scene of the accident and inform the rescue service.

Accident reporting points: Sign 🛉

Emergency Phone Number: **112**

PISTE MAINTENANCE SERVICE

All open pistes are prepared every night and then once again in the morning if snow falls overnight. Preparing the pistes while they are in operation carries the risk of skiers colliding with the snow groomers. Therefore, only "unavoidable" grooming runs are permitted during the day. Subsequent grooming does not fall into this category. Please pay attention to the warning lights and horn of the snow groomer and stay at a safe distance from it. Fresh snow can lead to the formation of moguls during the course of the day, we ask for your understanding.

CABLE WINCH GROOMING

Some pistes are groomed using a cable winch. That means that the cable, which hoists the snow groomer, crosses the piste. Please pay attention to areas which are cordoned off. The ski pistes are typically closed daily from 4:30 pm to 8:00 am. During this period, there is no danger protection! There is a risk of injury due to slope grooming using snow groomers, snow cannons, lane grooves, winch cables, exposed cables and pipes from the snow-making equipment. Please observe display panels and signs at the respective ski resorts, especially during night skiing.

ARTIFICIAL SNOW

Please stay well clear of the snow-making equipment and the snow cannons. Visibility may decrease in the vicinity of the snow cannons, and the quality of the snow may vary.

PLEASE COMPLY WITH THE 10 FIS RULES OF CONDUCT FOR SLOPES AND SNOWPARKS AT ALL SKI RESORTS!
